

439 Articles Published in *FSI Genetics* between ISFG 2019 and ISFG 2022 (vol. 43 to vol. 60)

1. Aalbers, S. E., Hipp, M. J., Kennedy, S. R., & Weir, B. S. (2020). Analyzing population structure for forensic STR markers in next generation sequencing data. *Forensic Science International-Genetics*, 49, 102364. doi:10.1016/j.fsigen.2020.102364
2. Achetib, N., van Weert, A., Birkel, M., van Leeuwen, T. G., Aalders, M. C. G., & van Dam, A. (2021). The compatibility of immunolabeling with STR profiling. *Forensic Science International-Genetics*, 52, 102485. doi:10.1016/j.fsigen.2021.102485
3. Adolfsson, E., Qvick, A., Green, H., Kling, D., Gunnarsson, C., Jonasson, J., & Green, A. (2021). Technical in-depth comparison of two massive parallel DNA-sequencing methods for formalin-fixed paraffin-embedded tissue from victims of sudden cardiac death. *Forensic Science International-Genetics*, 53, 102522. doi:10.1016/j.fsigen.2021.102522
4. Agostini, V., Bailo, P., Chiti, E., Linarello, P., Gentile, G., Primignani, P., . . . Piccinini, A. (2020). Ocular swabs on exhumed bodies: An alternative to the collection of "classical" tissue samples in forensic genetics. *Forensic Science International-Genetics*, 44, 102206. doi:10.1016/j.fsigen.2019.102206
5. Agudo, M. M., Aanes, H., Roseth, A., Albert, M., Gill, P., & Bleka, O. (2022). A comprehensive characterization of MPS-STR stutter artefacts. *Forensic Science International-Genetics*, 60, 102728. doi:10.1016/j.fsigen.2022.102728
6. Akutsu, T., Saito, H., Watanabe, K., Toyomane, K., Yamagishi, T., & Iwase, H. (2022). Evaluation and simultaneous determination of rectal mucosa markers by multiplex reverse transcription-PCR for biological evidence of sexual assault with anal penetration. *Forensic Science International-Genetics*, 59, 102712. doi:10.1016/j.fsigen.2022.102712
7. Albani, P. P., Patel, J., & Fleming, R. I. (2020). Detection of five specified menstrual fluid mRNA markers over the uterine cycle. *Forensic Science International-Genetics*, 49, 102359. doi:10.1016/j.fsigen.2020.102359
8. Alcalde, M., Nogue-Navarro, L., Tiron, C., Fernandez-Falgueras, A., Iglesias, A., Simon, A., . . . Brugada, R. (2022). Rare variants in genes encoding structural myocyte contribute to a thickened ventricular septum in sudden death population without ventricular alterations. *Forensic Science International-Genetics*, 58, 102688. doi:10.1016/j.fsigen.2022.102688
9. Aliferi, A., Sundaram, S., Ballard, D., Freire-Aradas, A., Phillips, C., Lareu, M. V., & Court, D. S. (2022). Combining current knowledge on DNA methylation-based age estimation towards the development of a superior forensic DNA intelligence tool. *Forensic Science International-Genetics*, 57, 102637. doi:10.1016/j.fsigen.2021.102637
10. Alladio, E., Della Rocca, C., Barni, F., Dugoujon, J. M., Garofano, P., Semino, O., . . . Cruciani, F. (2020). A multivariate statistical approach for the estimation of the ethnic origin of unknown genetic profiles in forensic genetics. *Forensic Science International-Genetics*, 45, 102209. doi:10.1016/j.fsigen.2019.102209
11. Allen, P. S., Pugh, S. N., Bright, J. A., Taylor, D. A., Curran, J. M., Kerr, Z., & Buckleton, J. S. (2021). Relaxing the assumption of unrelatedness in the numerator and denominator of likelihood ratios for DNA mixtures. *Forensic Science International-Genetics*, 51, 102434. doi:10.1016/j.fsigen.2020.102434
12. Alterauge, A., Losch, S., Sulzer, A., Gysi, M., & Haas, C. (2021). Beyond simple kinship and identification: aDNA analyses from a 17th-19th century crypt in Germany. *Forensic Science International-Genetics*, 53, 102498. doi:10.1016/j.fsigen.2021.102498
13. Ambrosio, I. B., Branganholi, D. F., Orlando, L. B. M., Andrekenas, N. C., Pontes, I. D., da Silva, D. A., . . . Gusmao, L. (2020). Mutational data and population profiling of 23 Y-STRs in three Brazilian populations. *Forensic Science International-Genetics*, 48, 102348. doi:10.1016/j.fsigen.2020.102348
14. Amorim, A., Pereira, F., Alves, C., & Garcia, O. (2020). Species assignment in forensics and the challenge of hybrids. *Forensic Science International-Genetics*, 48, 102333. doi:10.1016/j.fsigen.2020.102333
15. Andersen, M. M., Caliebe, A., Kirkeby, K., Knudsen, M., Vihrs, N., & Curran, J. M. (2020). Estimation of Y haplotype frequencies with lower order dependencies. *Forensic Science International-Genetics*, 46, 102214. doi:10.1016/j.fsigen.2019.102214
16. Atkinson, K., Arsenault, H., Taylor, C., Volgin, L., & Millman, J. (2022). Transfer and persistence of DNA on items routinely encountered in forensic casework following habitual and short-duration one-time use. *Forensic Science International-Genetics*, 60, 102737. doi:10.1016/j.fsigen.2022.102737
17. Attia, M. H. (2022). A cautionary note on altered pace of aging in the COVID-19 era. *Forensic Science International-Genetics*, 59, 102724. doi:10.1016/j.fsigen.2022.102724
18. Avila, E., Speransa, P. A., Lindholz, C. G., Kahmann, A., & Alho, C. S. (2022). Haplotype distribution in a forensic full mtDNA genome database of admixed Southern Brazilians and its association with self-declared ancestry and pigmentation traits. *Forensic Science International-Genetics*, 57, 102650. doi:10.1016/j.fsigen.2021.102650
19. Bai, Z. C., Zhang, N., Liu, J. W., Ding, H., Zhang, Y. K., Wang, T., . . . Ou, X. L. (2022). Identification of missing persons through kinship analysis by microhaplotype sequencing of single-source DNA and two-person DNA mixtures. *Forensic Science International-Genetics*, 58, 102689. doi:10.1016/j.fsigen.2022.102689
20. Bamberg, M., Bruder, M., Dierig, L., Kunz, S. N., Schwender, M., & Wiegand, P. (2022). Best of both: A simultaneous analysis of mRNA and miRNA markers for body fluid identification. *Forensic Science International-Genetics*, 59, 102707. doi:10.1016/j.fsigen.2022.102707
21. Bamberg, M., Dierig, L., Kulstein, G., Kunz, S. N., Schmidt, M., Hadrys, T., & Wiegand, P. (2021). Development and validation of an mRNA-based multiplex body fluid identification workflow and a rectal mucosa marker pilot study. *Forensic Science International-Genetics*, 54, 102542. doi:10.1016/j.fsigen.2021.102542
22. Barbaric, L., Lipovac, K., Sukser, V., Rozic, S., Korolija, M., Zimmermann, B., & Parson, W. (2020). Maternal perspective of Croatian genetic diversity. *Forensic Science International-Genetics*, 44, 102190. doi:10.1016/j.fsigen.2019.102190
23. Barrio, P. A., Garcia, O., Phillips, C., Prieto, L., Gusmao, L., Fernandez, C., . . . Alonso, A. (2020). The first GHEP-ISFG collaborative exercise on forensic applications of massively parallel sequencing. *Forensic Science International-Genetics*, 49, 102391. doi:10.1016/j.fsigen.2020.102391

439 Articles Published in *FSI Genetics* between ISFG 2019 and ISFG 2022 (vol. 43 to vol. 60)

24. Beasley, J., Shorrock, G., Neumann, R., May, C. A., & Wetton, J. H. (2021). Massively parallel sequencing and capillary electrophoresis of a novel panel of falcon STRs: Concordance with minisatellite DNA profiles from historical wildlife crime. *Forensic Science International-Genetics*, 54, 102550. doi:10.1016/j.fsigen.2021.102550
25. Benschop, C. C. G., Hoogenboom, J., Bargeman, F., Hovers, P., Slagter, M., van der Linden, J., . . . Sijen, T. (2020). Multi-laboratory validation of DNAsx including the statistical library DNASTatistX. *Forensic Science International-Genetics*, 49, 102390. doi:10.1016/j.fsigen.2020.102390
26. Benschop, C. C. G., Slagter, M., Nagel, J. H. A., Hovers, P., Tuinman, S., Duijs, F. E., . . . Kneppers, A. L. J. (2022). Development and validation of a fast and automated DNA identification line. *Forensic Science International-Genetics*, 60, 102738. doi:10.1016/j.fsigen.2022.102738
27. Benschop, C. C. G., van der Gaag, K. J., de Vreede, J., Backx, A. J., de Leeuw, R. H., Zuniga, S., . . . Sijen, T. (2021). Application of a probabilistic genotyping software to MPS mixture STR data is supported by similar trends in LR compared with CE data. *Forensic Science International-Genetics*, 52, 102489. doi:10.1016/j.fsigen.2021.102489
28. Benschop, C. C. G., van der Linden, J., Hoogenboom, J., Ypma, R., & Haned, H. (2019). Automated estimation of the number of contributors in autosomal short tandem repeat profiles using a machine learning approach. *Forensic Science International-Genetics*, 43, 102150. doi:10.1016/j.fsigen.2019.102150
29. Bergseth, E. F., Tillmar, A., Haddeland, J. T., & Kling, D. (2022). Extended population genetic analysis of 12 X-STRs-Exemplified using a Norwegian population sample. *Forensic Science International-Genetics*, 60, 102745. doi:10.1016/j.fsigen.2022.102745
30. Bertoglio, B., Grignani, P., Di Simone, P., Polizzi, N., De Angelis, D., Cattaneo, C., . . . Previdere, C. (2020). Disaster victim identification by kinship analysis: the Lampedusa October 3rd, 2013 shipwreck. *Forensic Science International-Genetics*, 44, 102156. doi:10.1016/j.fsigen.2019.102156
31. Bevc, T. B., Bozic, L., Podovsovnik, E., Zupanc, T., & Pajnic, I. Z. (2021). Intra-bone nuclear DNA variability and STR typing success in Second World War 12th thoracic vertebrae. *Forensic Science International-Genetics*, 55, 102587. doi:10.1016/j.fsigen.2021.102587
32. Biello, R., Zampiglia, M., Corti, C., Deli, G., Biaggini, M., Crestanello, B., . . . Canestrelli, D. (2021). Mapping the geographic origin of captive and confiscated Hermann's tortoises: A genetic toolkit for conservation and forensic analyses. *Forensic Science International-Genetics*, 51, 102447. doi:10.1016/j.fsigen.2020.102447
33. Bille, T. W., Fahrig, G., Weitz, S. M., & Peiffer, G. A. (2020). An improved process for the collection and DNA analysis of fired cartridge cases. *Forensic Science International-Genetics*, 46, 102238. doi:10.1016/j.fsigen.2020.102238
34. Bleka, O., Just, R., Le, J., & Gill, P. (2020). An examination of STR nomenclatures, filters and models for MPS mixture interpretation. *Forensic Science International-Genetics*, 48, 102319. doi:10.1016/j.fsigen.2020.102319
35. Bonito, M., D'Atanasio, E., Trombetta, B., Cannone, F., Berti, A., & Cruciani, F. (2021). Letter to the Editor: Identification and molecular characterisation of an unusually short allele at the SE33 (ACTBP2) locus resulting in a putative tri-allelic pattern at a flanking marker. *Forensic Science International-Genetics*, 54, 102523. doi:10.1016/j.fsigen.2021.102523
36. Boonderm, N., Sangpueng, S., Nettakul, A., & Waiyawuth, W. (2020). Genetic polymorphism study on 21 autosomal STR loci of populations from six geographical regions in the Kingdom of Thailand. *Forensic Science International-Genetics*, 47, 102297. doi:10.1016/j.fsigen.2020.102297
37. Bouakaze, C., Delehelle, F., Saenz-Oyhereguy, N., Moreira, A., Schiavinato, S., Croze, M., . . . Balaesque, P. (2020). Predicting haplogroups using a versatile machine learning program (PredYMaLe) on a new mutationally balanced 32 Y-STR multiplex (Combyplex): Unlocking the full potential of the human STR mutation rate spectrum to estimate forensic parameters. *Forensic Science International-Genetics*, 48, 102342. doi:10.1016/j.fsigen.2020.102342
38. Bowman, Z., Daniel, R., Gerostamoulos, D., Woodford, N., & Hartman, D. (2022). Rapid DNA from a disaster victim identification perspective: Is it a game changer? *Forensic Science International-Genetics*, 58, 102684. doi:10.1016/j.fsigen.2022.102684
39. Bozza, S., Scherz, V., Greub, G., Falquet, L., & Taroni, F. (2022). Corrigendum to "A probabilistic approach to evaluate salivary microbiome in forensic science when the defense says: 'It is my twin brother' (vol 57, 102638, 2022)". *Forensic Science International-Genetics*, 59, 102701. doi:10.1016/j.fsigen.2022.102701
40. Bozza, S., Scherz, V., Greub, G., & Taroni, F. (2022). A probabilistic approach to evaluate salivary microbiome in forensic science when the Defense says: 'It is my twin brother'. *Forensic Science International-Genetics*, 57, 102638. doi:10.1016/j.fsigen.2021.102638
